HOW TO SET UP A

nice CLINIC SPACE

Size of Space

The room should be a minimum of 6'x7' to be wheelchair accessible and needs to be well-lit for our clinicians.

Accessibility

If there is no elevator, there must be fewer than three stairs into the building and/or office entrance for a technician to perform a mobile X-ray or EKG.

Furnishings

Employer to provide the following:

- Provider chair and reclining patient chair
  to assist abdominal exams
- Wastebasket
- Hand sanitizer & face masks
- Table for supplies

Privacy Level

Have a closed door and white noise machine to protect private health information.

Making an Appointment at the Office

When employees make an appointment with Nice, make sure they provide helpful information for the clinician to find the office quickly. This includes parking information, ways to access the building, and the floor and suite number.
